1 Introduction

1.1 Introduction to the Project

Urban Sprout is an e-commerce website for promoting eco-friendly and sustainable living via proper choice of environmentally suitable products. The platform focuses on products that are reusable household goods, organic gardening kits, biodegradable packaging and sustainable lifestyle accessories. By accumulating all these products together in the same place, the platform targets to make proper choices more accessible and convenient for consumers who may elsewhere struggle to search for reliable green alternatives.

The objective of the Urban Sprout is to drive environmentally conscious consumption by emphasizing sustainable brands and practices. There is a large necessity for products that minimize waste and carbon footprints due to matters regarding growing environmental degradation and climate change. Carbon footprint is one of the harmful components that hinders environment friendly components. This e-commerce platform not just caters to necessity but also educates people regarding the importance of sustainability via product description, blogs and practical guides. It serves as both a marketplace and an awareness-building source for greener living.

Moreover, Urban Sprout is designed in a proper way for better user experience and cater environmental impact which ensures efficient navigation, transparent product information and reliable sources. By blending technology with sustainability, the platform upholds urban gardening, eco-friendly habits and greener ethics. Ultimately, the project yields to the transition towards sustainable development by empowering people to make suitable and responsible purchasing decisions in their everyday lives.

(WWF, 2026) (The Ellen MacArthur Foundation, 2026)

1.2 Goals and Objectives

Goal: Promote sustainable and eco-friendly products.

Explanation: The vital role of Urban Sprout platform is to emphasize sustainable and eco-friendly items which ultimately drives environmentally responsible living. The platform supplies alternatives to conventional goods that usually contribute to pollution and resources depletion. By making eco-friendly products more approachable, the platform encourages people to adapt to greener consumption habits. Furthermore, it targets to spread awareness regarding sustainable choice like reducing waste, preserving natural resources and minimizing carbon footprints.

Objectives: Convey messages to people regarding sustainability and responsible consumptions via blogs and guides. Offers a website which is easy to use with proper information regarding products and reliable transaction procedures. Moreover, assists people to make correct decisions via showcasing sustainable products and its benefits.

(United Nations Statistics Division, 2026)

1.3 Technologies Used

The Urban Sprout website is made using front-end web technologies like HTML, CSS and JavaScript. These technologies work simultaneously to create a visually appealing, responsive and interactive e-commerce website for users.

a) Hyper Text Markup Language (HTML)

Hyper Text Markup Language (HTML) is used to create basic frames and content of the webpages. It defines elements like headings, paragraphs, images, forms, sections and so on. It acts as the skeleton of the website by managing content in a proper format that web browsers can display properly.

(Mozilla Corporation, 2026)

b) Cascading Style Sheets (CSS)

Cascading Style Sheets (CSS) is used to control the design, colors, layout, spacing, fonts and overall appearance of the website. The different types of CSS used in web development are:

- **Inline CSS:** In inline CSS, styling is applied directly in an HTML element using style attribute. It is used for specific styling changes.
- **Internal CSS:** In internal CSS, rules for CSS are written inside <style> which is basically a HTML tag. This method is used for styling a single page.
- **External CSS:** In external CSS, styling is written separately in another file which is then linked to the HTML document. This is the most efficient and commonly used practice because it allows consistent styling across multiple web pages and makes changes and maintenance easier.

(Mozilla Corporation, 2025)

c) JavaScript

JavaScript (JS) is used to attach responsive and dynamic features to the website. It is contained within a web page and integrates with its HTML, CSS content. It can easily change the content of HTML elements and their CSS properties. It helps to create form validation, product filtering and interactive buttons. It enhances user experience by building the website more engaging and responsive to user actions.

(Mozilla Corporation, 2025)

1.4 Verdict

The Urban Sprout project is crucial as it promotes long-term development of the environment by enhancing responsible habits via an accessible e-commerce platform. Upon raising environmental obstacles like pollution, climate change and excessive waste production, there is a concern for eco-friendly alternatives. By catering sustainable alternatives and raising awareness regarding responsible utilization, the platform directs people to implement correct decisions that have positive and progressive influence on the environment.

Moreover, the project blends technology with sustainability by presenting people with both understanding of subject matter and a reliable online shopping experience. The platform not just sells products but rather teaches people regarding sustainable living like waste reduction and gardening in cities. This builds the project more valuable for emphasizing environmental conservation and a greener lifestyle.

2 Documentation: Discussion and Analysis

2.1 Selected Text Editor

The Urban Sprout platform was developed using Visual Studio code (VS code) as the chief text editor. Additionally, Git and GitHub were used for version control and project management. VS code was chosen as it upholds multiple languages like HTML, CSS and JavaScript. It is also user-friendly as it provides useful attributes like live server, syntax highlighting, code completion and so on. These attributes ultimately improve productivity during web development.

Git and GitHub were selected to manage and centralize project files efficiently. Git supported track changes made during development and GitHub provided a cloud-based platform to create and store repository which ultimately helped collaborate productively.

Visual Studio code (VS code) strongly benefited the development of the Urban Sprout website via improved coding experience and minimizing error through real-time suggestion and formatting support. The integration of Git within Visual Studio code simplified committing changes and merging files with GitHub. Altogether, these technologies established an organized and effective workflow throughout the website development phase.

(Microsoft, 2024) (Git, 2026) (GitHub, 2024)

2.2 Wireframe Development Tool

Figma was used as a wireframe development tool for the blueprint of every page of the Urban Sprout website like home page, product page, blog page, research page, about us page and contact page. Figma was chosen because it generates the prototype which benefits in multiple ways. It is a cloud-based design tool that allows easy invention of website layouts and user interface design. This helped picturize the layout, structure, navigation system and so on beforehand. With the help of Figma, the team was able to plan the overall design steadily and figure out betterment in user experience during the beginning phases of development.

(Figma, 2024)

2.3 Individual Page Documentation

- A. Home Page: It consists of categories which include seeds, plants, tools, soils and fertilizers. Also, popular products category and vision to create greener and healthier cities by reconnecting people with nature.

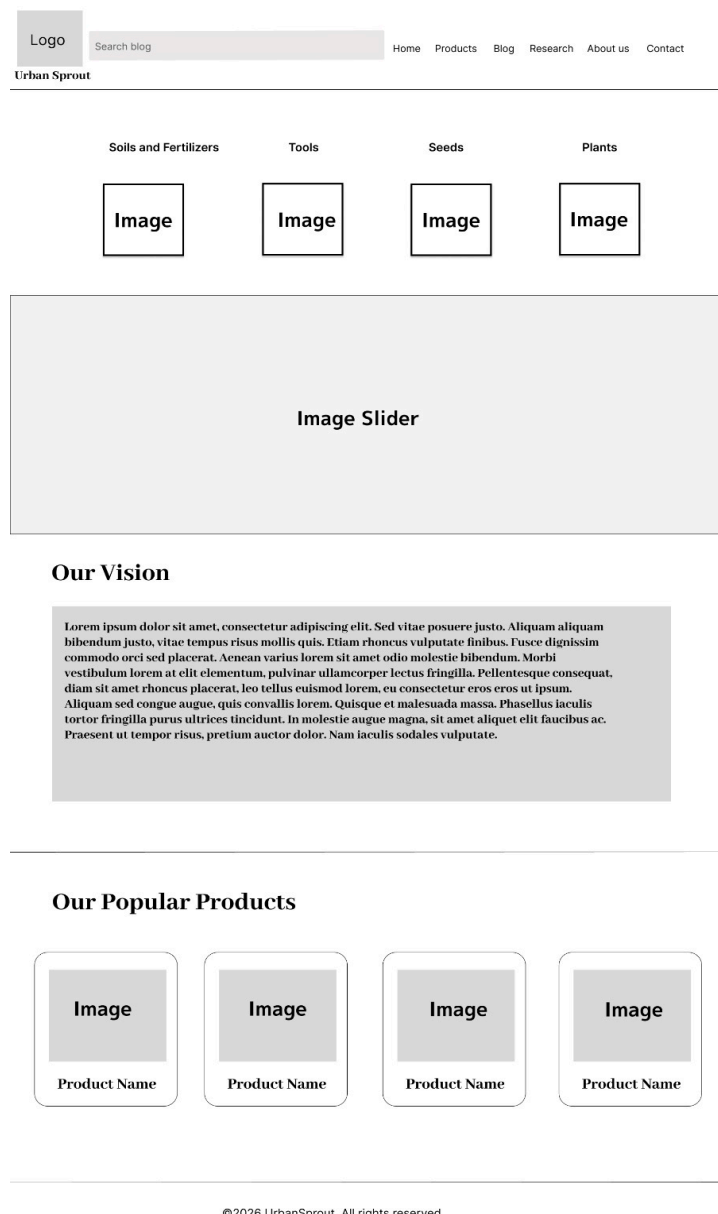

Figure 1 Wireframe of Home Page

Figure 2 Final Home Page Layout

- B. Product Page: It consists of eco-friendly product categories like seeds, plants, tools, soils and fertilizers for greener journeys.

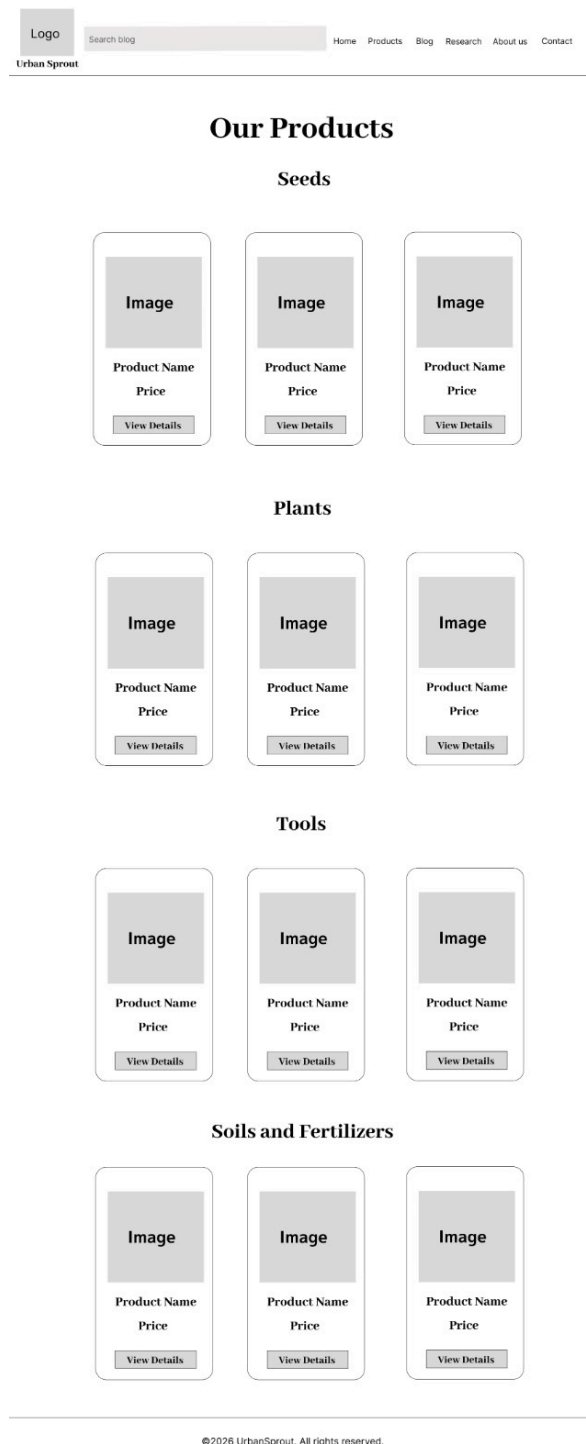

Figure 3 Wireframe of Product Page

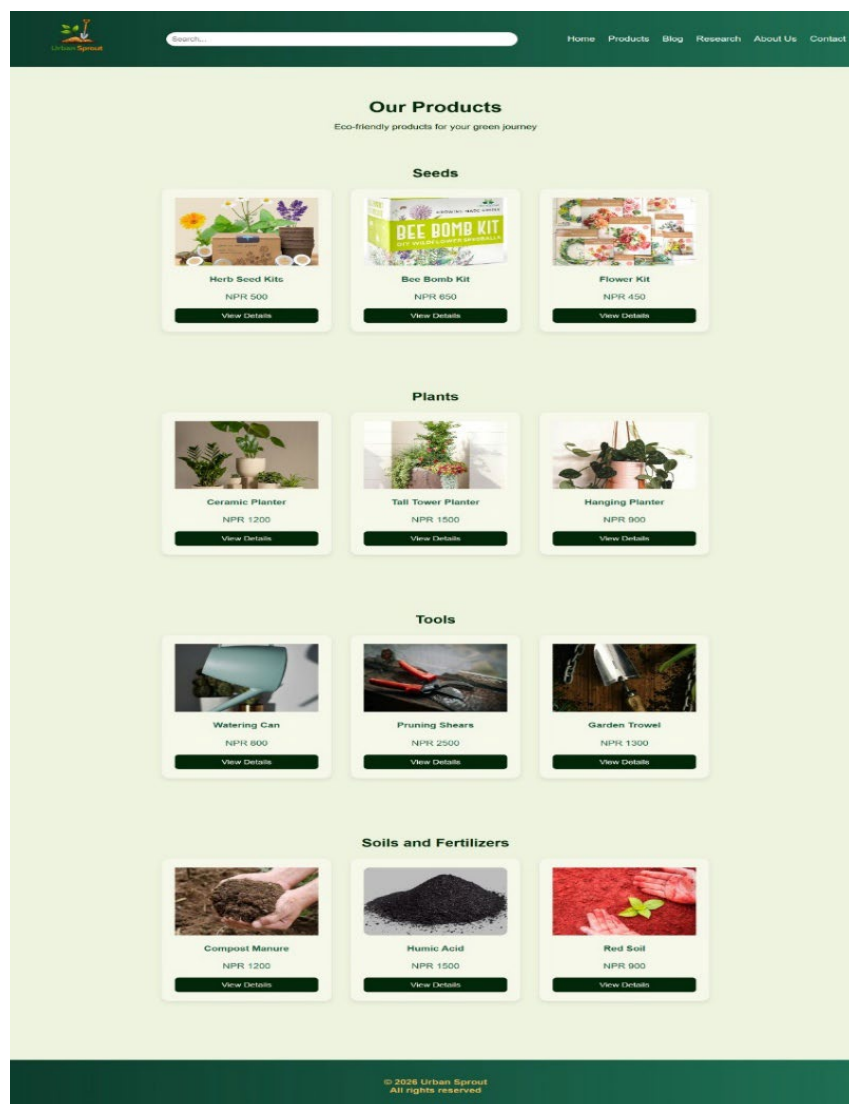

Figure 4 Final Product Page Layout

C. Product Description Page: It consists of product details and its price.

Technology in Urban Gardening

Ever thought you needed a big backyard to grow your own food? Not anymore. As cities continue to expand, traditional agriculture struggles to meet the demand for fresh produce. Urban gardening transforms rooftops, kitchens, and balconies into productive green spaces. The success of urban gardening is not just about space—it depends on technology. Smart farming tools improve efficiency and productivity in limited environments.

Technology in Urban Gardening

Technology in urban gardening plays a crucial role by enabling efficient plant growth in small spaces using automated watering systems, IoT sensors, and soil-less methods like hydroponics and aeroponics. These technologies support vertical farming, allowing multiple crop layers in compact areas. With AI and data, gardeners can precisely control light, water, and nutrients for better yields.

Positive Impacts

- 
Efficient use of limited urban space:
Urban gardening allows food production in rooftops, balconies, and indoor areas using vertical farming.
- 
Reduced water consumption:
Hydroponics and drip irrigation recycle water efficiently, using far less than traditional farming.
- 
Faster and healthier plant growth:
Controlled environments provide optimal nutrients and conditions for better crop growth.
- 
Real-time monitoring:
IoT sensors track moisture, humidity, and plant health for quick adjustments.
- 
Year-round production:
Controlled systems allow continuous crop growth regardless of seasons.

Negative Impacts

- 
High setup cost:
Equipment like lights, sensors, and systems make initial setup expensive.
- 
Requires technical knowledge:
Users must understand smart systems and nutrient management.
- 
Higher energy consumption:
Artificial lighting and systems increase electricity usage.
- 
System maintenance required:
Regular monitoring is needed to avoid system failure.
- 
Limited accessibility:
Cost and complexity make it harder for beginners.

Urban gardening powered by technology is not just a trend—it is the future of sustainable living.

3 Testing

3.1 Test1: Internal Link

Checking the nav bar links of the homepage.

Table 1 Internal Link Test

Objective	Testing the nav bar links of all pages to check whether the links are working correctly.
Action	Clicked on all the pages.
Expected Result	The pages should open when clicked.
Actual Result	The pages opened.
Result	The pages displayed successfully.

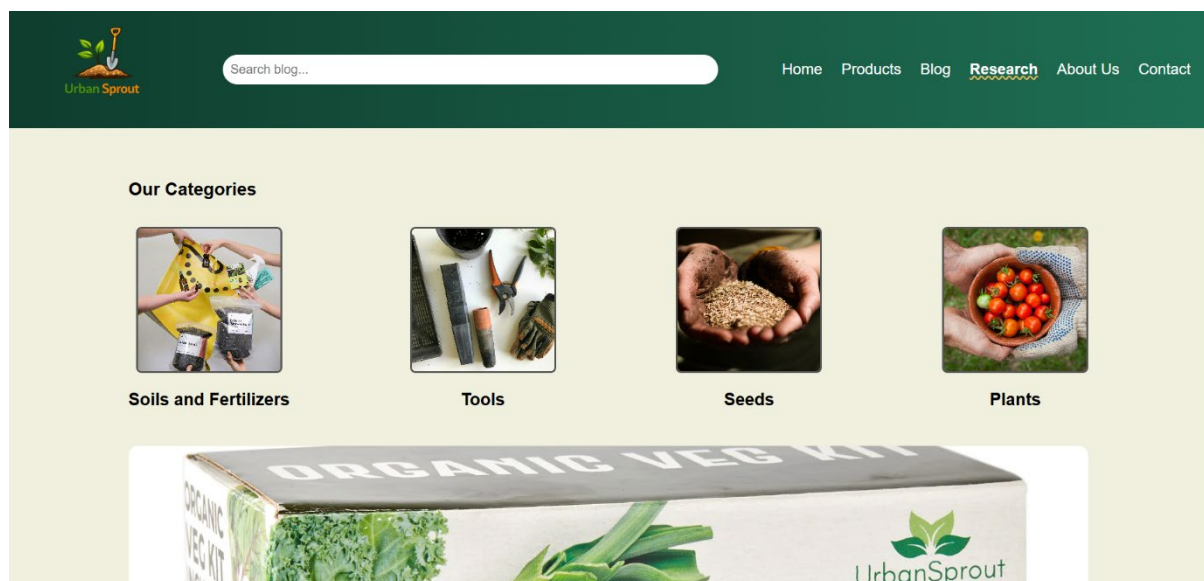

Figure 17 Internal Link before testing

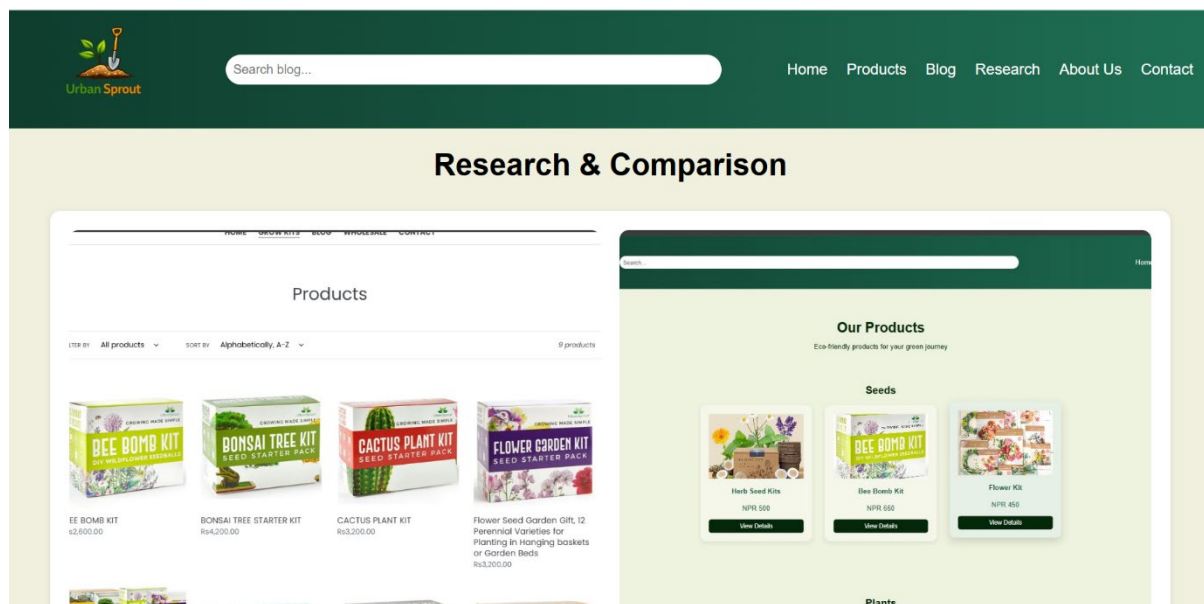

Figure 18 Internal Link after testing

3.2 Test2: External Link

Testing the external links on research page for the reference sites.

Table 2 External Link Test

Objective	Performing the testing for the external links on research page checking whether the reference site links leads to the site.
Action	Clicked on the image of the reference website.
Expected Result	The image should open the site in another tab.
Actual Result	The site opened in another tab.
Result	The nursery live site was opened successfully after clicking the link.

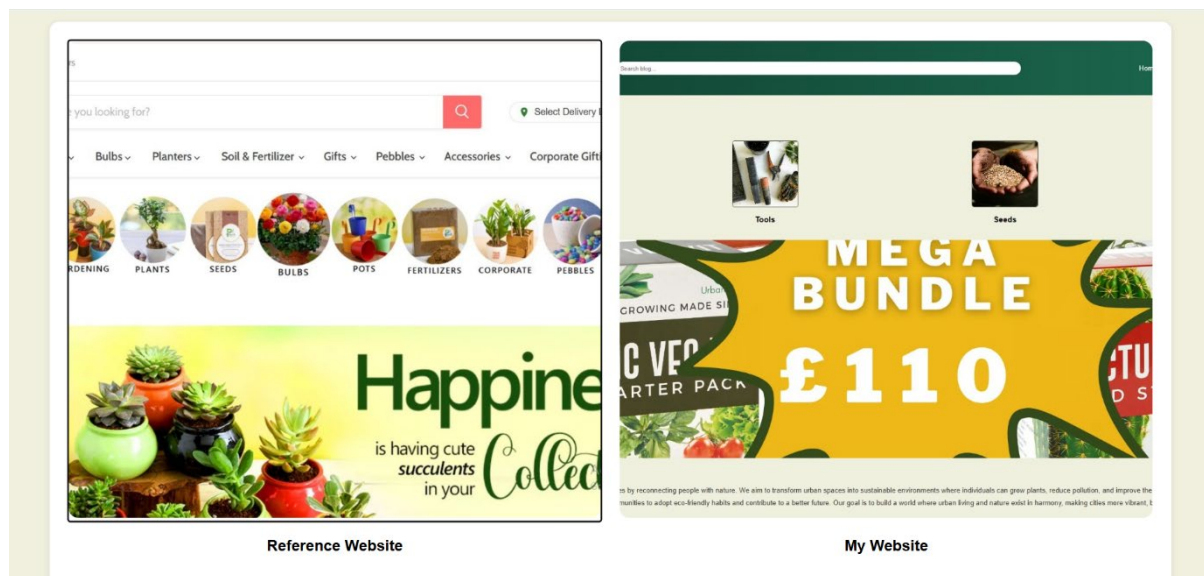

Figure 19 External Link before testing

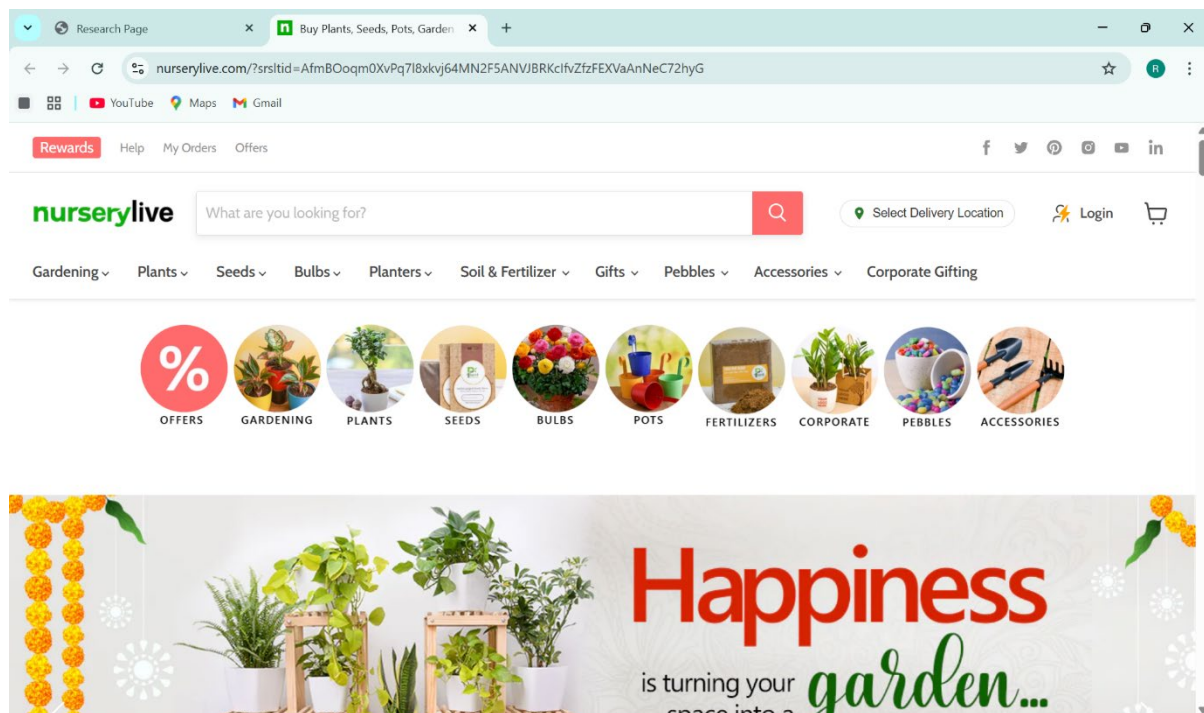

Figure 20 External Link after testing

3.3 Test3: Hover Effect

Testing the hover effect on cards in the blog page.

Table 3 Hover Effect Test

Objective	Testing the hover effects on blog cards to get shadow and enlarged effect.
Action	Hovered on the second blog card to get the hovering effect.
Expected Result	The card should have shadow around it along with a scaling effect when hovered over it.
Actual Result	The card gave the shadow effect, and the image enlarged little bit when hovered.
Result	The card showed the hover effect successfully.

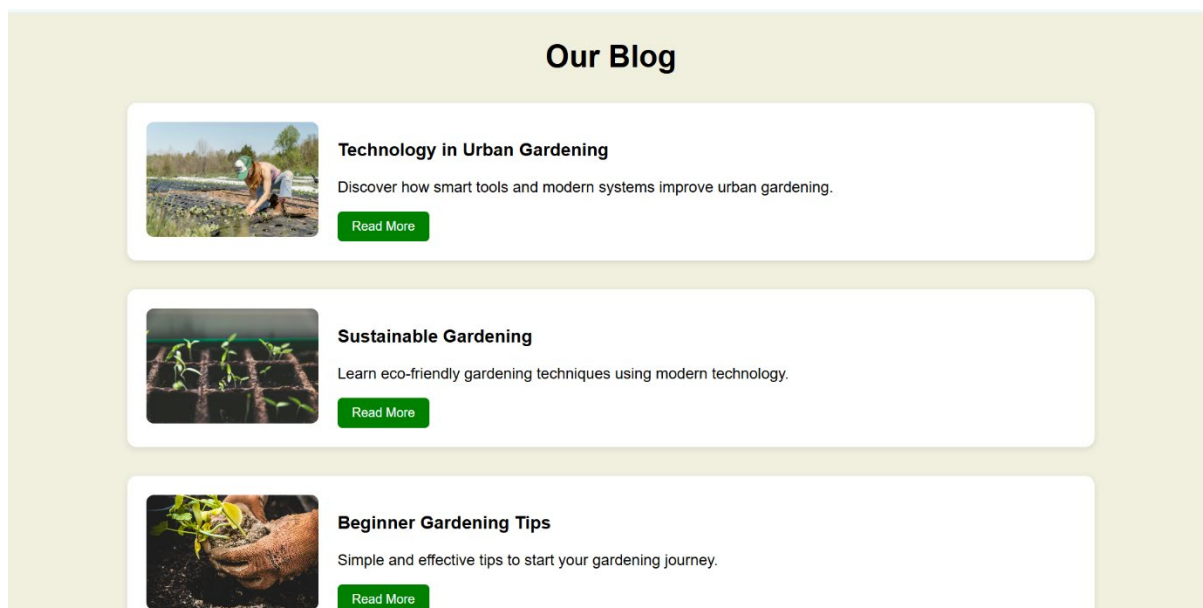

Figure 21 Hover Effect before testing

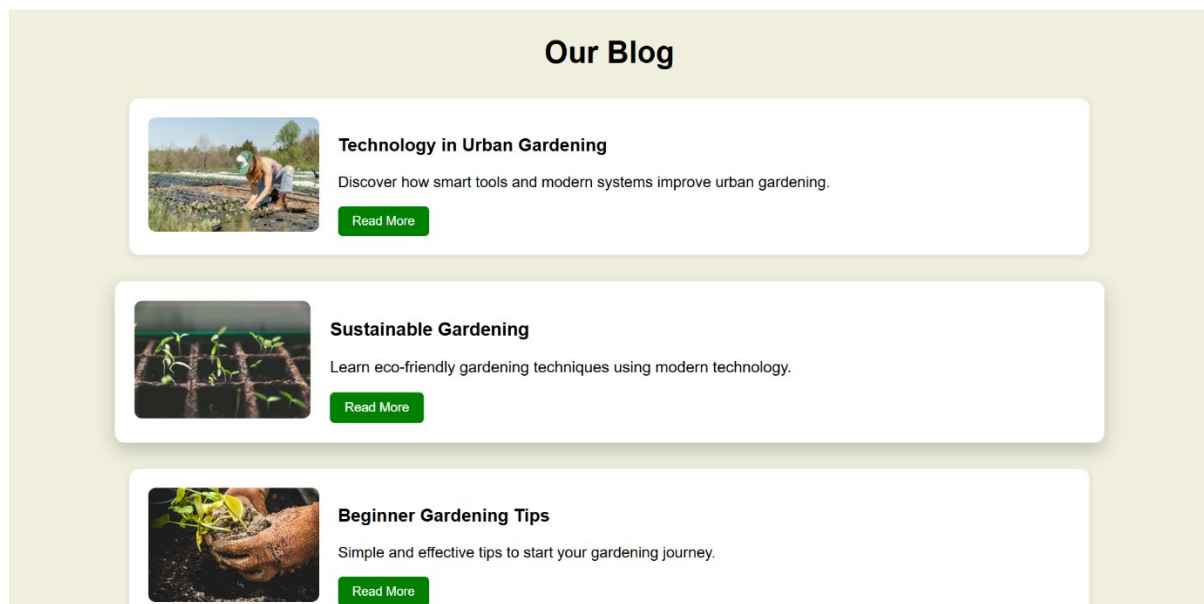

Figure 22 Hover Effect after testing

3.4 Test4: Form Validation (JavaScript Test 1)

Validating the form after successful submission

Table 4 Form Validation Test

Objective	Form is tested to show a successful message after clicking the submit button.
Action	The submit button is clicked by filling up the necessary details.
Expected Result	The form should show up with a successful message at the bottom right after filling up the details.
Actual Result	Successful message popped up at the bottom after the submission.
Result	The form was submitted successfully with the pop-up message.

Figure 24 Form Validation after testing

3.5 Test5: JavaScript Test 2

Form validations with missing field details.

Table 5 JavaScript Test 2

Objective	Validating the form by intentionally missing some field details and submitting the form.
Action	Submitting the form with empty fields.
Expected Result	The empty fields should display error messages.
Actual Result	The empty fields displayed error messages.
Result	The form successfully showed error messages and did not get submitted.

Figure 26 After JavaScript Test2

3.6 Test6: JavaScript Test 3

Testing the dynamic rendering of model box content of team members in About Us page.

Table 6 JavaScript Test 3

Objective	Clicking the respective team members cards know more button to display the modal box with their respective dynamic content information.
Action	Clicked on one of the team member cards know more to display their information in a modal box in the current tab.
Expected Result	The content should be dynamically displayed in a modal box format with their information after clicking the know more button.
Actual Result	The information gets dynamically displayed in the modal box format along with the details after the button is clicked.
Result	The test was successful with the dynamic rendering of the team member information in a modal box.

4 Conclusion

4.1 Tasks Completed

During the development of the Urban Sprout website, several important tasks were successfully completed to cater for people with smooth experience at e-commerce platforms. The project began with planning and analysis followed by wireframe formation of different pages like home page, product page, blog page, research page, about us page and contact page.

The platform was developed using HTML, CSS and JavaScript to make it responsive and interactive. HTML was used to structure the content, CSS was used to apply styling and layout, and JavaScript was used to make the platform interactive. The development phase also overviewed on enhancing the visual appearance, functionality and responsiveness of the website.

Additionally, Git and GitHub were used for version control and project management throughout the development phase. These tools assisted centralized the project files, merge changes efficiently, manage code updates and create backup versions of the website. Testing was done to ensure proper of the website to hand over a smooth user experience.

4.2 Research and Findings

During the development of the Urban Sprout platform, several important discoveries and lessons were mastered regarding web development, design, user experience and sustainable e-commerce implementation. One of the vital learnings was the importance of planning and wireframing beforehand proceeding to the development phase. By forming wireframes in Figma, it directed systematize website arrangement, improving overall structure before coding. This made the development process more convenient and minimized issues regarding design later in the project.

Moreover, the other important learning was understanding use of HTML, CSS and JavaScript and blending them together to create responsive and interactive websites. HTML provides the basic skeleton like structure of webpages, CSS improved visual appearance and responsiveness while JavaScript provide dynamic and interactive features.

Furthermore, the use of Git and GitHub assisted in version control and project management. These tools help manage code changes, merge updates and preserve backup versions during development phase. The research aware of sustainable e-commerce and the rising demand for environmentally friendly products showcasing the use of technology to emphasize eco-friendly lifestyles and responsible utilization.

<h3>Our Vision</h3>

<div class="vision-box">

    <p>Our vision is to create greener, healthier cities by reconnecting people with
nature. We aim to transform

        urban spaces into sustainable environments where individuals can grow
plants, reduce pollution, and

        improve their quality of life. Through small but meaningful actions, we strive
to inspire communities to

        adopt eco-friendly habits and contribute to a better future. Our goal is to
build a world where urban

        living and nature exist in harmony, making cities more vibrant, balanced,
and sustainable for

        generations to come. 🌱 </p>

<section>
```

```
<p>
```

```
<strong>Ever thought you needed a big backyard to grow your own
food?</strong>
```

```
Not anymore.<br>
```

```
As cities continue to expand, traditional agriculture struggles to meet the
demand for fresh produce.
```

```
Urban gardening transforms rooftops, kitchens, and balconies into productive
green spaces.
```

```
</p>
```

<p>

The success of urban gardening is not just about space—it depends on technology.

Smart farming tools improve efficiency and productivity in limited environments.

</p>

</section>

<section>

<h2>Technology in Urban Gardening</h2>

<p>

Technology in urban gardening plays a crucial role by enabling efficient plant growth

in small spaces using automated watering systems, IoT sensors, and soil-less methods like hydroponics

and aeroponics.

</p>

<p>

These technologies support vertical farming, allowing multiple crop layers in compact areas.

With AI and data, gardeners can precisely control light, water, and nutrients for better yields.

</p>

</section>

<!-- POSITIVE IMPACT -->

<section>

<h2 style="color: green;">Positive Impacts</h2>

<article style="display: flex; align-items: center; gap: 15px; margin-bottom: 15px;">

<p>

<b style="color: grey;">Efficient use of limited urban space:

Urban gardening allows food production in rooftops, balconies, and indoor areas using vertical farming.

</p>

</article>

<article style="display: flex; align-items: center; gap: 15px; margin-bottom: 15px;">

<p>

<b style="color: grey;">Reduced water consumption:

Hydroponics and drip irrigation recycle water efficiently, using far less than traditional farming.

</p>

</article>

<article style="display:flex; align-items:center; gap:15px; margin-bottom:15px;">

<p>

<b style="color:grey;">Faster and healthier plant growth:

Controlled environments provide optimal nutrients and conditions for better crop growth.

</p>

</article>

<article style="display:flex; align-items:center; gap:15px; margin-bottom:15px;">

<p>

<b style="color:grey;">Real-time monitoring:

IoT sensors track moisture, humidity, and plant health for quick adjustments.

</p>

</article>

<article style="display:flex; align-items:center; gap:15px; margin-bottom:15px;">

<p>

<b style="color:grey;">Year-round production:

Controlled systems allow continuous crop growth regardless of seasons.

</p>

</article>

</section>

<!-- NEGATIVE IMPACT -->

<section>

<h2 style="color: red;">Negative Impacts</h2>

<article style="display:flex; align-items:center; gap:15px; margin-bottom:15px;">

<p>

<b style="color:grey;">High setup cost:

Equipment like lights, sensors, and systems make initial setup expensive.

</p>

</article>

<article style="display:flex; align-items:center; gap:15px; margin-bottom:15px;">

<b style="color:grey;">Requires technical knowledge:

Users must understand smart systems and nutrient management.

</p>

</article>

<article style="display:flex; align-items:center; gap:15px; margin-bottom:15px;">

<b style="color:grey;">Higher energy consumption:

Artificial lighting and systems increase electricity usage.

</p>

</article>

<!-- BLOG CONTENT -->

<main>

  <section>

    <p style="color:#666; max-width:900px; margin:20px auto; line-height:1.6;">

      As environmental concerns continue to grow, sustainable gardening has
      become more important than ever.

      People are now looking for ways to grow plants while conserving water,
      reducing waste, and minimizing
      environmental impact.

      Modern technology plays a crucial role by helping gardeners grow plants more
      efficiently while protecting
      natural resources.

    </p>
```

</section>

<section>

<h2>What is Sustainable Gardening?</h2>

<p>

Sustainable gardening is a method of growing plants in an environmentally friendly and resource-efficient way.

It focuses on reducing waste, conserving water, and maintaining soil health. Technology has made it easier to

apply

these practices even in urban environments.

</p>

</section>

<!-- SMART WATER MANAGEMENT -->

<section>

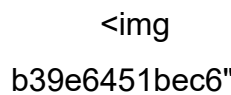

<h2 style="color:green;">Smart Water Management</h2>

<article style="display:flex; align-items:center; gap:15px; margin-bottom:20px;">

<p>

Automated irrigation systems:

Water plants only when needed, preventing waste.

 src="https://images.unsplash.com/photo-1501004318641-b39e6451bec6"

style="width:80px; height:80px; border-radius:10px; object-fit:cover;" alt=""

Soil moisture sensors:

Detect water levels and avoid overwatering.

 src="https://images.unsplash.com/photo-1555949963-aa79dcee981c"

style="width:80px; height:80px; border-radius:10px; object-fit:cover;" alt=""

Drip irrigation:

Delivers water directly to roots efficiently.

<p style="text-align:center; color:grey;font-style: italic; ">

Result: Better water conservation and healthier plants.

</p>

</section>

<!-- ENERGY -->

<section>

<h2 style="color:green;">Energy and Resource Optimization</h2>

<article style="display:flex; align-items:center; gap:15px; margin-bottom:15px;">

<p><b style="color:#808080">LED grow lights: Use less energy for plant growth.</p>

</article>

<article style="display:flex; align-items:center; gap:15px; margin-bottom:15px;">

<p><b style="color:#808080">Solar energy: Powers sustainable gardening systems.</p>

</article>

<p style="text-align:center; color:grey;font-style: italic;">

Result: Lower environmental impact.

</p>

</section>

<!-- YEAR ROUND -->

<section>

<h2 style="color:green;">Year-Round Gardening</h2>

<p style="line-height:1.6;">

Technology allows plants to grow throughout the year regardless of weather conditions.

</p>

<ul style="line-height:1.6;">

Indoor systems control temperature and light

Hydroponics supports faster growth

Climate control ensures stable production

<p style="text-align:center; color:grey;font-style: italic;">

Result: Continuous food supply all year.

```

```
<h2 style="color:green;">Conclusion</h2>
```

```
<p style="line-height:1.6;">
```

Technology is transforming sustainable gardening by making it more efficient, eco-friendly, and accessible.

It helps save water, reduce waste, and improve food production. In the future, smart gardening will play a key

role

in building greener and more self-sufficient communities.

<section>
```

```
<p>
```

Urban gardening is becoming increasingly popular as more people look for ways to grow their own food in

limited spaces.

Whether you have a balcony, rooftop, or just a sunny window, you can start your gardening journey with minimal resources.

</p>

<p>

If you're new to gardening, don't worry—starting small and learning the basics is the key to success.

</p>

</section>

<!-- SECTION 1 -->

<section>

<h2>Start Small and Simple</h2>

<article style="display:flex; gap:15px; align-items:center; margin:20px 0;">

<p>

Begin with easy plants:

Mint, basil, coriander, spinach, and lettuce are great beginner plants.

</p>

</article>

```
</section>
```

```
<!-- SECTION 2 -->
```

```
<section>
```

```
<h2>Choose the Right Location</h2>
```

```
<article style="display:flex; gap:15px; align-items:center; margin:20px 0;">
```

```

```

```
<p>
```

```
<b>Sunlight is important:</b><br>
```

```
Most plants need 4–6 hours of sunlight daily.
```

```
</p>
```

```
</article>
```

```
</section>
```

```
<!-- SECTION 3 -->
```

```
<section>
```

```
<h2>Use the Right Containers</h2>
```

```
<article style="display:flex; gap:15px; align-items:center; margin:20px 0;">
```

```

```

```
<p>
```

```
<b>Proper pots matter:</b><br>
```

```
Always use containers with drainage holes.
```

```
</p>
```

```
</article>
```

```
</section>
```

```
<!-- SECTION 4 -->
```

```
<section>
```

```
<h2>Water Smartly 💧 </h2>
```

```
<article style="display:flex; gap:15px; align-items:center; margin:20px 0;">
```

```

```

```
<p>
```

```
<b>Avoid overwatering:</b><br>
```

```
Water only when soil feels dry.
```

```
</p>
```

```
</article>
```

```
</section>
```

```
<!-- SECTION 5 -->
```

```
<section>
```

```
<h2>Use Good Soil</h2>
```

```
<article style="display:flex; gap:15px; align-items:center; margin:20px 0;">
```

```

```

```
<p>
```

```
<b>Healthy soil matters:</b><br>
```

```
Use organic compost for better growth.
```

```
</p>
```

```
</article>
```

```
</section>
```

```
<!-- SECTION 6 -->
```

```
<section>
```

```
<h2>Start with Basic Tools</h2>
```

```
<article style="display:flex; gap:15px; align-items:center; margin:20px 0;">
```

```

```

```
<p>
```

```
<b>Simple tools are enough:</b><br>
```

```
Watering can, shovel, spray bottle, fertilizer.
```

```
</p>
```

```

<header>

  <h1>Do's and Don'ts in Urban Gardening</h1>

</header>

<!-- BLOG CONTENT -->

<main>
```

<section>

<p>

Urban gardening is a great way to grow fresh food in limited spaces like balconies, rooftops, or indoor

corners.

However, success depends on following the right practices and avoiding common mistakes.

</p>

<p>

This guide will help you understand what to do—and what to avoid—for a healthy and productive urban garden.

</p>

</section>

<!-- DO'S -->

<section>

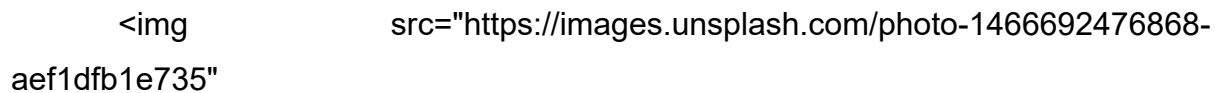

<h2>Do's in Urban Gardening</h2>

<article style="display:flex; gap:15px; margin:20px 0; align-items:center;">

<p>

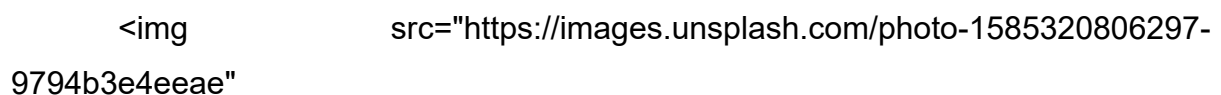

Use space smartly:

Use vertical shelves, hanging pots, and wall planters to maximize small areas efficiently.

Choose the right plants:

Start with herbs and leafy greens that grow easily in available sunlight conditions.

Maintain soil health:

Use organic compost and refresh soil regularly for better plant growth.

</p>

</article>

<article style="display:flex; gap:15px; margin:20px 0; align-items:center;">

<p>

Water wisely:

Water only when soil is dry and avoid overwatering your plants.

</p>

</article>

<article style="display:flex; gap:15px; margin:20px 0; align-items:center;">

<p>

Monitor plant health:

Check regularly for pests and diseases and act early when needed.

</p>

</article>

</section>

```
<!-- DON'TS -->
```

```
<section>
```

```
<h2>Don'ts in Urban Gardening</h2>
```

```
<article style="display:flex; gap:15px; margin:20px 0; align-items:center;">
```

```

```

```
<p>
```

```
<b>Don't overcrowd plants:</b><br>
```

```
Plants need space to grow properly and avoid disease spread.
```

```
</p>
```

```
</article>
```

```
<article style="display:flex; gap:15px; margin:20px 0; align-items:center;">
```

```

```

```
<p>
```

```
<b>Don't overwater:</b><br>
```

```
Too much water can damage roots and stop healthy growth.
```

```
</p>
```

```
</article>
```

```
<article style="display:flex; gap:15px; margin:20px 0; align-items:center;">
  
  <p>
    <b>Don't ignore sunlight:</b><br>
    Without proper light, plants become weak and unhealthy.
  </p>
</article>
```

```
<article style="display:flex; gap:15px; margin:20px 0; align-items:center;">
  
  <p>
    <b>Don't skip maintenance:</b><br>
    Regular pruning and cleaning tools is necessary for healthy gardening.
  </p>
</article>
```

```
<article style="display:flex; gap:15px; margin:20px 0; align-items:center;">
```

<p>

Don't rely only on technology:

Observation and care are still the most important parts of gardening.

</p>

</article>

</section>

<!-- CONCLUSION -->

<section>

<h2>Conclusion</h2>

<p>

Urban gardening can be highly rewarding when done correctly. By following simple do's and avoiding common

mistakes,

you can maintain a healthy and productive garden even in small urban spaces.

</p>

<p>

Consistency, care, and observation are the real keys to success.

```

  <h2>About Me</h2>
```

```
  <p>
```

A creative and passionate individual who loves designing, crafting, and bringing ideas to life.

I enjoy exploring the world of web development while expressing my creativity through art and design.

Constantly learning and experimenting, I aim to combine technology with creativity to build meaningful

and visually appealing projects.

```
</p>
```

```
</section>
```

```
<!-- STORY -->
```

<section class="story">

<h2>My Story</h2>

<p>

My journey started with a natural love for creativity. From a young age, I enjoyed sketching, painting,

and making different kinds of craft work. Creating something from nothing always made me feel happy

and fulfilled. Whether it was drawing on paper or designing handmade items, I was always excited to

bring my imagination into reality.

</p>

<p>

As I grew older, I discovered the world of technology and design. I realized that creativity is not

limited to paper or physical art—it can also be expressed digitally. When I started learning web

development, it felt like a whole new canvas opened for me. At first, it was challenging to understand

how everything worked, but with practice, I began to enjoy the process.

</p>

<p>

Now, I love combining my artistic skills with technology. Designing webpages, choosing colors, and

arranging layouts feels similar to painting or sketching—just in a digital form. Every project I

create helps me improve both my technical and creative abilities. This journey continues to inspire

me to learn more, explore new ideas, and keep creating in different ways.

</p>

<section class="my-story">  
  <h2>My Story</h2>  
  <p>  
    My interest in computers started in Grade 6 when I was first introduced to  
QBasic programming.  
    It was the first time I understood how programs run and how computers  
follow instructions. In Grade 7, I  
    learned HTML and created a simple website about the 2072 earthquake  
disaster in Nepal. Even though the  
    design was not good, it taught me a lot and made me more curious about  
websites and technology.
```

</p>

<p>

During high school, I became more interested in computers, gadgets, cybersecurity, and how systems work.

Exploring different tools and learning about online safety helped me understand the importance of

problem-solving

and continuous learning. These experiences made me enjoy programming because every project teaches

something new and gives me a chance to create useful solutions.
